

INOAPPS ▶ CONSTRUCTION INDUSTRY SCHEME (CIS) CLOUD

Ensure Your Business is HMRC CIS Compliant

As a construction business operating in the UK, your organisation has certain obligations under the Construction Industry Scheme (CIS). These include checking whether your subcontractors are registered with Her Majesty's Revenue & Customs (HMRC), paying subcontractors and submitting monthly returns. This can often be a complex and inefficient process with little audit, control and governance.

Inoapps CIS Cloud is part of the Inoapps Engineering & Construction Cloud, a complete solution for Financials, Projects, Supply Chain and Human Resources which will support you in managing all your subcontractor interactions. CIS Cloud enables you to keep up to date and compliant with CIS legislation and reduce the time you spend managing the tax implications of using subcontractors.

You can do everything you need to, quickly and simply, so that you comply with the law, avoid costly fines associated with late payments and focus on your core business, rather than filling out forms. Developed using our experience with numerous construction industry clients, your organisation can deploy the application alongside your current Oracle ERP Cloud implementation to deliver an integrated, end-to-end business process for the full CIS lifecycle.

Built on Oracle Platform as a Service

- The safest, fastest and most cost-effective way to extend Oracle SaaS applications
- Provides a seamless end-user experience through single sign on and shared roles and responsibilities
- Delivers unmatched security, scalability, availability and performance

The Inoapps CIS Cloud Allows You To:

- Track and record all CIS specific information for your key subcontractors
- Automatically validate that information against HMRC records for data integrity
- Carry out automated re-validating of CIS subcontractor details against HMRC database on a periodic basis
- Receive automated notification of changes or issues with subcontractor validation
- Automatically calculate the relevant CIS deductions from subcontractor payments, based on work breakdown type
- Generate automated payments to HMRC for appropriate value for CIS deductions
- Track CIS related data against supplier records to record Unique Taxpayer Reference (UTR) certification and validity
- Automate verification of supplier UTR details against HMRC database of approved contractor CIS registrations for new suppliers
- Configure payment generation to HMRC based on powerful rules engine
- Generate a submissions report to HMRC at the end of each period which collates the individual subcontractor deductions made within that period.

Key Benefits

SAVES you time and avoids costly mistakes by standardising and automating processes

ASSISTS compliance with HMRC and avoids costly fines

ALLOWS you to focus on value-added tasks rather than process administration

Why Inoapps?

Inoapps is an award-winning, global Oracle Platinum Partner, named Oracle's Cloud First Partner of the Year 2018/19. For more than a decade we have focussed on delivering cutting edge Oracle solutions, which help our global clients to drive operational excellence and maximise the benefits of their technology investments.

A leading Engineering & Construction industry expert since 2006, we successfully delivered the first multi-country, multi-pillar roll-out of Oracle Cloud in a multi-national E&C business. Our depth of expertise and commitment to our customers is demonstrated by consistent recognition from Oracle and the fact that our first customer is still a customer more than ten years later.
