

CUSTOMER GO-LIVE

# Leading construction company accelerates growth with Oracle Cloud ERP and HCM

## INDUSTRY

Engineering & Construction

## LOCATION

United States

## CUSTOMER PROFILE

Our customer is a leader in the construction of highly complex and diverse projects across a broad range of industries, including Government, Healthcare, High Tech and Commercial.

## THE CHALLENGE

The Engineering and Construction industry is experiencing radical transformation, discovering new ways to develop key business processes, increase efficiency, and improve overall performance. Our customer came to us with the need to adopt modern technologies to help accelerate rapid growth and maintain their reputation as one of the leading construction firms in the industry.

The company has three distinct operating entities (general contractor, sub-contractor and equipment rental) that needed to be managed and integrated into a single system sharing Oracle Modern Best Practices and common data elements. They then wanted to automate their day-to-day operations in order to better serve their customers, subcontractors, vendors and employees.

## OBJECTIVES

- › Fully integrate the three operating entities into one system
- › Streamline data sharing across the organization
- › Prepare the company for rapid growth through a modern platform and standard processes
- › Time Entry costing for projects and integration to ADP for payroll processing

## WHY INOAPPS?

Our close partnership with Oracle and proven expertise gave our customer confidence in our ability to deliver what they needed. The real game changers here were our construction expertise and accelerators, especially our Inoapps Rentals product, which provided the extra tooling the project needed for efficient delivery of a solution that met our customer's niche needs.

## THE SOLUTION

We provided our customer with the best long-term solution for their needs, implementing a wide Oracle footprint of Enterprise Resource Planning (ERP), Core Human Capital Management (HCM), Time and Labor, Procurement and Project Costing integrated with project execution systems and ADP for payroll. This enables process automation and integration between operations and finance, reducing manual processes and IT resource constraints. Full integration built out on Oracle Integration Cloud gave our customer an Oracle-centric footprint that they can scale over time. The Inoapps Rentals solution addressed their need to directly integrate their rentals business with finance for a connected and complete process.

## SOLUTIONS IMPLEMENTED

- › ERP – Financials and Project Financials
- › SCM – Procurement and Inventory
- › HCM – Core HR, Time and Labor, Payroll Interface
- › Inoapps Construction Cloud – Equipment Rental
- › APEX custom application
- › Oracle Integration Cloud
