

Oracle AI Success Navigator Mobilize

Unlock the true business value of your investment in Oracle Cloud Applications

Oracle's powerful cloud applications deliver continuous innovation, but many organizations struggle to realize their full value. Oracle AI Success Navigator gives businesses a toolkit to help close the gap. Yet for teams with little time to invest, it's just another application to learn, adopt and embed.

Inoapps will set up AI Success Navigator around your individual business needs and guide you through its key benefits, then keep you on track as new features are released across both your Oracle applications and AI Success Navigator itself.

If any of this sounds familiar, it's time to talk to Inoapps

Making Oracle's innovation work for you

Oracle delivers new capabilities every quarter, but spotting what's relevant, assessing the impact, and planning adoption takes time your team may not have. AI Success Navigator shows you where you stand today, surfaces opportunities for improvement, and helps you build a roadmap for what's next. Inoapps configures, embeds and enables the platform, so you start realizing value sooner.

Get you up and running on AI Success Navigator without the cost, learning curve and disruption of going it alone

AI Success Navigator helps you:

- | | |
|---|---|
|  Gain a clear view of your Oracle applications landscape and current configuration |  Accelerate adoption with guided deployment plans, testing strategies and automated test scripts |
|  Identify unused capabilities and close the gap between what you've bought and what you're using |  Explore Oracle modern best practice processes for new modules in a safe environment before committing to change |
|  Focus on Oracle features that are most relevant to your business and objectives |  Get instant answers to Oracle functionality and process questions using natural language prompts |
|  Build a roadmap of enhancements, based on business value, effort and strategic impact |  ... and much more |

As part of the service, we will

Deploy and configure

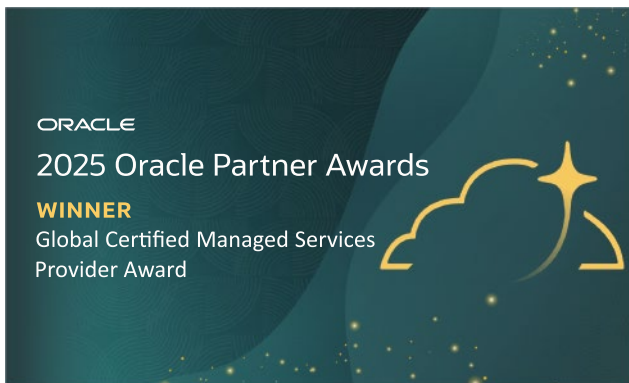

- Provision your AI Success Navigator platform correctly, in partnership with Oracle
- Populate it with your own modules, enabled functions and features
- Run an initial gap-assessment to identify optional features you can and should be using today
- Optionally, deploy the Oracle Starter Pack to a non-Production Oracle environment for safe, guided user enablement

Enable and empower

- Provide desk-side training so your super users and business process owners get full value from AI Success Navigator
- Help you build and manage a continuous roadmap of feature enablement, aligned to your business processes and drivers

Review and refine

- Review your usage every six months to keep you on track and ensure you're benefiting from newly released features

Ready to put Oracle's innovation to work for you?
