

Oracle Integration Cloud Assessments

Uncover integration risks, improve consistency and strengthen governance across your OIC estate

Over time, even well-designed Oracle Integration Cloud environments can become harder to govern and support. New interfaces are added, business requirements change and different teams contribute to development. Without clear standards and regular review, inconsistent design approaches, gaps in documentation and unclear ownership can introduce operational, security and compliance risks that remain hidden until they impact business-critical processes.

The Inoapps Oracle Integration Cloud Assessment gives you a structured way to review and strengthen your integration estate. Our integration specialists combine stakeholder interviews with hands-on analysis of your OIC platform to assess how your integrations are designed, configured, and operate, identify risks and provide clear, actionable recommendations aligned with Oracle best practice.

If any of this sounds familiar, it's time to talk to Inoapps

Your integrations were built by different teams or under tight deadlines, resulting in inconsistent designs and standards

Ownership of interfaces is unclear, making issues and changes more difficult to manage

Your integration architecture contains single points of failure or lacks the resilience needed to support business-critical processes

Increasing complexity and over-engineered integrations are making your environment harder to support, scale and adapt

You don't have a clear view of how your integrations are structured, documented and maintained

You're concerned about integration reliability, including monitoring, error handling and recovery

Data is being processed or retained within the integration layer without clear governance around security, data residency, retention or compliance

Take control of your integration estate

Our Oracle Integration Cloud Assessment will give you a clear understanding of your OIC environment, identify risks and improvement opportunities and build a strong foundation for future growth. You'll get:

A clear, independent view of your Oracle Integration Cloud landscape

Identification of design issues, risks and inefficiencies

Improved integration performance, resilience and maintainability

Alignment to Oracle best practice architecture and standards

Better visibility and governance across integrations

A solid foundation for future optimization or transformation initiative

How the assessment works

1 Discover

- Stakeholder interviews to understand integration requirements and challenges
- Review of available documentation and architecture

3 Analyze

- Identification of gaps, risks and inefficiencies
- Benchmarking against Oracle best practice for OIC implementations

5 Repeat

- Track remediation progress and emerging risks
- Maintain integration quality and governance
- Align with evolving business and integration need
- Available as a Quarterly, Bi-Annual or Annual service.

2 Assess

- Hands-on review of OIC integrations, flows and configurations
- Analysis of design patterns, orchestration and connectivity
- Review of monitoring, error handling and operational processes

4 Report & present

- Structured findings report produced
- Presentation session with clear recommendations and next steps

What the assessment covers

- | | |
|---|---|
| ✓ Review of Oracle Integration Cloud configuration and architecture | ✓ Assessment of integration design patterns, orchestration and reusability |
| ✓ Analysis of inbound, outbound and API-based integrations | ✓ Review of adapters, REST services and file-based integrations |
| ✓ Assessment of error handling, logging, monitoring and operational processes | ✓ Evaluation of integration security, access controls and governance |
| ✓ Review of documentation, naming standards and governance approach | ✓ Stakeholder interviews and hands-on inspection of integrations and configurations |
| ✓ Structured discovery report with findings, recommendations and next steps | ✓ Presentation of findings to stakeholders |
