

DATASHEET

# Inoapps Rentals Cloud

Total visibility of your rental assets

Rentals-intensive industries, such as Energy and Engineering & Construction face a universal challenge when it comes to tracking the location, associated costs and status of equipment.

Managing the rental lifecycle is difficult and time-consuming. Inoapps Rentals Cloud and Oracle Cloud Enterprise Resource Planning (ERP) enable end-to-end execution of the rentals process that ensures the right equipment is at the right place, at the right time—every time.

## Challenges

1

Reporting of rental data from order to invoice is often inaccurate, late and time-consuming to manage.

2

The location and status of rentals are often tracked in spreadsheets or held offline, making them difficult to track, amend, invoice and audit.

3

Businesses are fined for late, incomplete or damaged return of equipment.

4

Projects become delayed due to breakdown of the rental supply chain.

## Why Inoapps Rentals Cloud?

Our Rentals Cloud solution is built on the combination of our total focus on Oracle technology and an in-depth knowledge of the challenges our customers in rentals-intensive industries face daily.

Inoapps Rentals Cloud and Oracle Cloud ERP give you instant visibility of equipment across the business. It's a holistic solution, catering for rentals to your customers, from third parties, and between business units within your organization. The solution offers simplified management of your rentals, including robust reporting, and empowers you to accurately track, plan and fulfil orders to customers, from suppliers and internally.

## Key benefits

Ensure the right rental items are at the right place, at the right time—every time

Manage rentals for effectively and improve efficiency

Minimize cost by reducing project delays and costs incurred for late returns

Maximize utilization and gain visibility of future requirements

Better tracking of project cost exposure through comprehensive reporting of key rental data

## Key features

### Rental Management

- ▶ Integrates with Oracle Procurement, to link rentals with an associated Purchase Orders, or with Oracle Order Management for an end-to-end lifecycle based on Sales Orders
- ▶ Allows for the extension, early termination and adjustment of rentals, while ensuring that all project accounting postings are kept accurate through operational changes
- ▶ Accommodates 'multi-hire' rentals, allowing for partial returns or rental increments
- ▶ Provides for auto-extension of rentals based on business rules and classifications
- ▶ Tracks Damages associated with a rental lifecycle
- ▶ Tracks shipping and logistics dates associated with a rental
- ▶ Deep integration with the Oracle Inventory for the tracking of items, inventory locations and sub inventory
- ▶ Ability to schedule item maintenance windows
- ▶ Ability to transfer items from one rental order to another
- ▶ Allows for retroactive and future allocation of rentals

### Billing

- ▶ Integrates with Oracle Financial Cloud for improved billing accuracy
- ▶ Automatic creation of Accounts Receivables (AR) Invoices, Accounts Payables (AP) Invoices and Receipts for all rentals
- ▶ Ability to cap the invoice amount based on defined criteria, allowing the user to restrict billing beyond the agreement terms
- ▶ Automation of billing allowing flexibility of frequency (for example daily, weekly or monthly billing)
- ▶ Ability to carry out adjustment of existing billing

### Reporting

- ▶ Provides a responsive interactive dashboard to provide key information
- ▶ Ability to report on all current and active rentals based on a wide range of criteria
- ▶ Ability to report on actual and forecasted rental utilization

## Built on Oracle Platform as a Service

- ▶ A safe, fast and cost-effective way to extend Oracle SaaS applications
- ▶ Provides a seamless end-user experience through single sign on and shared roles and responsibilities
- ▶ Delivers unmatched security, scalability, availability and performance

## The Inoapps Product Portfolio

The Inoapps Product Portfolio has been created to aid with the complexities our focus industries deal with every day, from managing subcontractors to tracking budget costs and rental inventories.

The products in this portfolio help ensure the accurate oversight of all aspects of a project lifecycle through fully integrated Oracle Cloud solutions built to tackle specific challenges. The portfolio is here to help you reduce complex administration and save time and money with greater control over financial planning and management.
