

# Inoapps Subcontractor Management Cloud

Track and manage every aspect of your subcontractor management lifecycle

Managing subcontractor payments and compliance is complicated and time consuming, especially if you need to navigate disparate systems and deal with Excel spreadsheets. It can be even more complex if you work with your subcontractors on an 'application and certification' basis to manage the payment cycle.

Inoapps Subcontractor Management Cloud integrates with Oracle Enterprise Resource Planning (ERP) to provide an end-to-end process that makes life easier when dealing with subcontractor admin. It covers Applications and Certification, Retentions, Contra Charges, and Withholding Tax, with functionality to automate processes to save you time and help you work with your subcontractors.

## Why Inoapps Subcontractor Management Cloud?

1

Enables end-to-end execution of the subcontractor management lifecycle in a single, fully integrated Oracle Cloud solution

3

Automates processing & management of applications and certifications for cumulative payments, retentions, contra charges and withholding tax (CIS in UK)

5

Enables compliance with the UK Construction Act

2

Tracks every aspect of the subcontractor management lifecycle with detailed reporting on work to date, budget remaining and estimate to complete

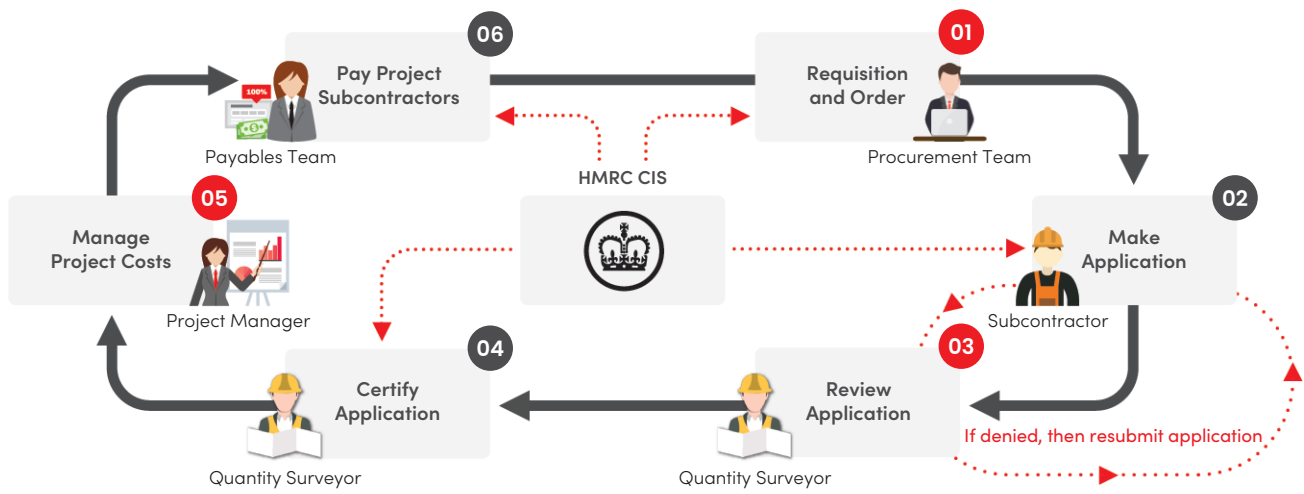

4

Provides increased visibility of subcontractor payments based on cumulative project delivery

## Subcontractor Management lifecycle

## Key benefits

Greater visibility of the financial performance of your subcontractors

Reduced corporate risk by ensuring accuracy in payment calculations

Protection from costly fines by addressing HMRC requirement for CIS payments

Improved financial control through better management of subcontractor retention

Detailed reporting on work to date, budget remaining and estimate to complete

## Built on Oracle Platform as a Service

- A safe, fast and cost-effective way to extend Oracle SaaS applications
- Provides a seamless end-user experience through single sign on and shared roles and responsibilities
- Delivers unmatched security, scalability, availability and performance

## Key features

### Subcontractor lifecycle management

- › Provides a structured and controlled framework through which subcontractors can make Applications for Payments
- › Applications then undergo an iterative cycle of review and amendment until an agreed and negotiated position is reached between the prime contractor and the subcontractor
- › Delivers specific stages of the business process not addressed by the standard Oracle solution

### Managing UK HMRC Construction Industry Scheme (CIS) validation

- › Tracks and records all CIS specific information for your key subcontractors, including Unique Taxpayer Reference, certification status and tax code
- › Automatically validates that information against HMRC records
- › Calculates the relevant CIS deductions from subcontractor payments
- › Generates automated payments to HMRC for the appropriate value of CIS deductions
- › Produces monthly subcontractor statements
- › Automatically keeps up to date with changes in legislation and validity of certifications

### Additional features

- › Retention / Retainage, catering for the full lifecycle of retention processing
- › Deductions and contra payments incorporated into subcontractor payments for net calculations
- › Ability to allow additional charges to be raised for insurance costs
- › Produces automated subcontractor certificates for HMRC filing
- › Automated workflow engine delivering emails and alerts to notify the Quantity Surveyor and subcontractor that applications have been processed
- › Reporting engine to allow multi-dimensional analysis of applications
- › HMRC certified processing calendar to ensure compliance with HMRC guidelines
- › Valuation calendar to control application lifecycle
- › Supports users in tracking the applications and certifications related to a specific contract

## The Inoapps Product Portfolio

The Inoapps Product Portfolio has been created to aid with the complexities our focus industries deal with every day, from managing subcontractors to tracking budget costs and rental inventories.

The products in this portfolio help ensure the accurate oversight of all aspects of a project lifecycle through fully integrated Oracle Cloud solutions built to tackle specific challenges. The portfolio is here to help you reduce complex administration and save time and money with greater control over financial planning and management.
