

Oracle Cloud Landing Zone

Your rapid route to Oracle Cloud

Effective cloud adoption can be a struggle, and it's often difficult to know where to start. A Cloud Landing Zone deployment by the experienced Oracle-only experts at Inoapps will establish the firm foundation you need as the starting point to move your workloads to Oracle Cloud.

Our standardized cloud deployment framework leverages best practices and automation to get you up and running fast. As part of our proven Cloud Adoption Framework (CAF), we'll get you started with a foundation to your cloud services that includes security, networking, governance and management, and with future growth in mind.

Why do I need this service?

What's included?

Your Oracle Cloud Landing Zone is delivered as either a stand-alone service or as part of an application migration.

Each Landing Zone includes:

1 Discovery

- Cloud architecture review and alignment with your individual needs
- Network and security configuration, management and governance
- Integration with your existing environment/s

3 Delivery

- Fully functional cloud operating environment
- Cloud Landing Zone deployment review
- Relevant cloud documentation and implementation guide

2 Deployment

- Provision of tailored Landing Zone services, such as E-Business Suite integration
- Provision of relevant management and monitoring controls
- Confirmation of network, security and compliance (CIS) controls

What can you expect when you work with Inoapps?

A highly experienced Oracle Certified Cloud Solutions Provider (CSPE) to cut through the complexity and ensure performance, resilience and security of the Oracle technology you rely on

Oracle-only experts with a proven track record advising, implementing and managing Oracle Cloud deployments across a variety of industries

An end-to-end service, from initial strategy to adoption and ongoing cloud management, all with a focus on optimizing your Oracle spend, ROI and commercials

A company at the forefront: Inoapps was the first Oracle partner in the United Kingdom to migrate Oracle E-Business Suite to the new Oracle Cloud platform when it first launched
