

# Licensing & Subscriptions | Oracle License Optimization

Optimize your Oracle assets to reduce spend and get more from your investment

If you're ready to take control of your Oracle estate and make sure you're getting all you can from your technology investment, it's time to speak to Inoapps.

Our Oracle License Optimization service works alongside our Licensing & Subscription Services to help ensure your Oracle deployments are working as efficiently as possible. This could be through asset consolidation, modeling your architectures to accurately match technical requirements, or recommending the optimal product editions for your business.

## If any of this sounds familiar, then it's time to talk to Inoapps

## How does the Oracle License Optimization Service work?

- Contractual analysis**

Our licensing specialists analyze the clauses in your contracts and provide an inventory of your licensed products. This includes metrics and quantities subscribed to and how they're deployed in the cloud or on-premises.
- Data analysis**

Here we examine your estate to form a holistic view of deployments and usage. We look at elements like your Disaster Recovery, production and test environments and their usage, such as integrations, data movement, and how your architecture works with third party apps.
- Actionable insights**

The result is a view of your estate 'as is' along with our recommendations for optimization. We look at current versus optimized spend, how to reduce support costs, and where existing licenses can be reharvested and deployed elsewhere. The technical data allows you to remodel without making changes to your live environment, to help you plan your strategy and develop practical steps to manage changes.
- Rinse and repeat**

As Oracle estates are subject to change, we treat this as an iterative process where we make recommendations for you to execute and then revisit your estate to assess where further savings can be realized.

## Why should you consider Oracle License Optimization, delivered by Inoapps?

Inoapps provides a hands-on, dedicated approach to Oracle license compliance and cost management. Our team of experts can help identify licensing risks and optimization opportunities and then roll up our sleeves to get the work done.

From infrastructure to applications, procurement to decommissioning, Inoapps is here to help you maximize your investment for your entire Oracle software asset management lifecycle.

Speak to us today if you're ready to:

➤ Reduce your spend

➤ Reduce your footprint

➤ Reharvest licenses for new deployments

➤ Take control of your security and compliance
