

Licensing & Subscription Services | Oracle SAM Program

Understand and protect your Oracle software assets in on-premises environments

The Oracle Software Asset Management (SAM) Program is here to help you manage and understand your Oracle license estate and usage to ensure your utilization matches the licenses you own.

The official Oracle program qualifies partners such as Inoapps to evaluate customer estates and align contracts with actual usage. The output of the evaluation is a report containing a series of recommendations to enable you to prepare for an audit waiver request to Oracle. If you're running Oracle Database, Fusion Middleware or E-Business Suite on-premises, we will help you clearly understand your current deployments and model future strategies around license procurement and management.

If any of this sounds familiar, then it's time to talk to Inoapps

Inoapps provides Oracle SAM Program licensing services for

Oracle Fusion Middleware

- WebLogic / Application Server
- Business Intelligence
- Identity Management

Oracle Database

- Oracle Database Options and Management Packs

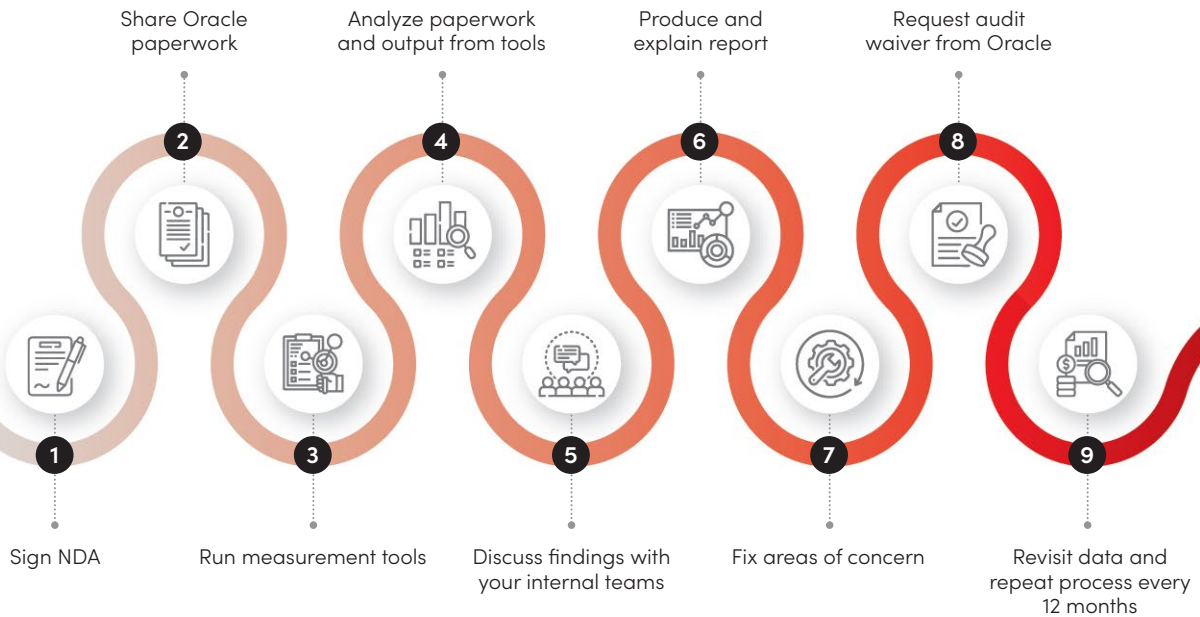

E-Business Suite Application

- Enterprise Resource Planning, Human Capital Management, Payroll, Supply Chain Management, Manufacturing

How does the Oracle SAM Program work?

Contractual analysis	Our licensing specialists analyze the clauses in your contracts and provide an inventory of your licensed products. This includes metrics and quantities purchased, whether they're in support and how they can be deployed.
Data analysis	Here we use the same methods Oracle use in an official audit to capture the usage data and identify issues caused by misinterpretation, incorrect deployments or poor housekeeping.
Actionable insights	You receive a clear report, known as the Baseline Report, which documents your estate and offers options for solutions to the issues uncovered.
Fixes	We help you fix the areas of concern as cost-effectively as possible.
Waiver request	Once fixes are complete, we request an audit waiver from Oracle.
Future proofing	We revisit your Baseline Report data annually, create an updated report, and reapply for a continuation of the waiver. Regular licensing reviews will also help you stay current with any changes to Oracle's licensing policies.

Here's what we do

Why should you consider the Oracle SAM Program, delivered by Inoapps?

From infrastructure to applications, procurement to decommissioning, we have extensive experience of Oracle software asset management. Inoapps is the first partner globally to be approved for the program, so you have the premier team of trusted Oracle-vetted licensing experts working for you.

The Oracle SAM Program is here to:

Minimize financial risks and penalties by identifying and addressing any license deficits in advance

Reduce risk of audits and qualify you to request an audit waiver

Give you direct access to ask Oracle licensing questions through our license experts

Provide ongoing peace of mind with regular licensing reviews that significantly increase your chances of staying compliant with Oracle's licensing policies

Visit our **Oracle Licensing & Subscriptions Services** web page to find out more about our licensing and subscription services.

Get in touch for a free 30 minute consultation to ask our experts any questions you may have or to find out more about our license and subscription services and team.
